Pull the power window motor out, clean up the gears and relube them. Then test them by applying battery power across the leads (use some jumper wires). If it moves freely and easily, you know it isn't the motor that is causing problems. Check how the window moves up and down the track. Look for obvious binding points. Lube the bottom track.

where is the power window relay located?? - Chevy Message ...

SOURCE: 2000 Chevy Venture shows gas gauge as always full.. if the remote works but the switches inside the van doesn't then the most likely fix would be the switch, tthough it is strange that both would quit. the place too start would be pop out the switch with a small screwdriver and disconnect the connector. the top left pin and the top middle pin is the unlock circuit in the switch. check ...
