A wide stopband microstrip LPF with a compact size using a defected rectangular-shaped resonator is designed and fabricated. To adjust all the TZs, all design process steps are analyzed based on the LC equivalent circuit. A reliable agreement has been obtained between the simulations and measurements.

Chapter 9: Column

# Acces PDF Analysis And

Design Of  
Introduction Columns  
are usually considered  
as vertical structural  
elements, but they can  
be positioned in any  
orientation (e.g.  
diagonal and horizontal  
compression elements  
in a truss). Columns  
are used as major  
elements in trusses,  
building frames, and  
sub-structure supports  
for bridges (e.g. piers).
