the separation for various cations and anions. 2. To perform qualitative analysis of two unknown solutions that contain various ions (cations and anions) and positively identify these ions using established schemes. Materials:

## **Lab 13 Qualitative Analysis of Cations and Anions**

## Read Online Analysis Of Anions Cations Lab Answers

In order to determine the anions in the unknown crystals (any ionic compound must contain both cations and anions) a somewhat different approach that does not require the separation of the anions will be used. The "spot test" procedure for the anions in lab Q-anion will study the common species  $\text{Cl}^- (\text{aq})$ ,  $\text{SO}_4^{2-} (\text{aq})$ ,  $\text{C}_2\text{O}_4^{2-} (\text{aq})$  and  $\text{CO}_3^{2-} (\text{aq})$ .
