Cessna P210N POH For prospective buyers and those without an electronic copy... these are hard to find anywhere. I have a scan of my POH from N731PJ 1980 P210N Serial 523. Obviously it may not be applicable to any other aircraft in question.

**Cessna P210N POH - Mark's Etcetera**  
Cessna got cracking on improving the 210, first by adding more windows and then, in 1962, widening the cabin by four inches. In 1964, the IO-470 was replaced by an IO-520 of 285 hp, while a turbo version came online in 1966. For 1967 the dowdy struts gave way to a new cantilever wing with 3 degrees of dihedral.

**1961 CESSNA 210A Two Ten - Specifications, Performance ...**  
The first-ever Cessna 210, flown about 50 years ago, was a 182 with retractable landing gear – a straight vertical tail and all. The first production 210 had a swept tail and a substantially different cowling from a 182's, but the cabin section was still the same as a 182's and, for that matter, as a 172's.

**Cessna T210 Turbo - AOPA**  
The early Cessna 210 (210 and 210A) had four seats with a Continental IO-470 engine of 260 hp (190 kW). It was essentially a Cessna 182B to which was added a retractable landing gear, swept tail, and a new wing. In 1961 the fuselage and wing were completely redesigned – the fuselage was made wider and deeper, and a third side window was added.

The Cessna 210 Centurion is a six-seat, high-performance, retractable-gear, single-engine, high-wing general aviation aircraft which was first flown in January 1957 and produced by Cessna until 1985. Disclaimer: Information on this site may not be accurate or current and is not valid for flight planning or any other aircraft operations.

**Cessna 210 Specifications, Cabin Dimensions, Speed**  
The Cessna 210L has a "steering lag" while taxiing; only steady, smooth pedal inputs will result in a controlled turn. Thus, it takes patience and anticipation to taxi a 210 correctly. Pedal inputs must be applied early and held for a relatively long time to cause a change in direction while rolling on the ground.

The Cessna 210 Centurion is a great aircraft. In its later variations, it is arguably the best single-engine travelling machine ever built. But as with any mechanical device, time and service have shown that there are areas of concern that owners/operators need to be aware of. Which is why CPA exists.

The 210 is a remarkably adaptable airplane. It's a great choice for a pilot that is qualified to fly complex airplanes, can comply with the requirements supplied by his insurance adjuster—or can pay for the required dual instruction—and has a need for a fast, capable heavy hauler.

**CESSNA P210N Aircraft For Sale - 14 Listings | Controller ...**  
Cessna's project engineer on the P-210 program, Phillip Hedrick, had his work cut out for him in attempting to sandwich a larger capacity turbo under the bonnet of the 210. The bigger turbo was needed to provide enough bleed air to pump up the cabin while not restricting the airplane's climb or cruise performance.
