Compound | Definition of Compound by Merriam-Webster

Polyphenols are a category of compounds naturally found in plant foods, such as fruits, vegetables, herbs, spices, tea, dark chocolate, and wine. They can act as antioxidants, meaning they can...

What Are Polyphenols? Types, Benefits, and Food Sources

A bioactive compound is any compound present in the foods of humans, animals, or plants that has an effect on the organism consuming it. Caffeine for example, would be a bioactive compound of coffee.

What is Bioactive Compounds? - Definition from MaximumYield

Any of a large class of organic compounds consisting of carbon, hydrogen, and oxygen, usually with twice as many hydrogen atoms as carbon or oxygen atoms. Carbohydrates are produced in green plants by photosynthesis and serve as a major energy source in animal diets. Sugars, starches, and cellulose are all carbohydrates.
