I measured to make sure I was in the middle of the particle-board board, and then drilled a 10mm hole, while doing my best to keep it at 90 degrees with my homemade 90-degree drill guide. I put an aluminum washer on the bolt before tightening it. Tips: If you drill the hole a bit oversized, it won't matter if the hole isn't perfectly vertical.

#### Amazon.com: drill guide

If you've ever tried to drill a perfectly straight and centered deep hole in the end of a board, you know that it's nearly impossible with a handheld drill. But add a drill press and a jig and the job becomes very doable. Make this jig from two 8-in. x 12-in. pieces of 3/4-in. plywood or medium-density fiberboard (MDF).
