industry: resistance spot welding, laser welding and arc welding. It provides a special focus on welding with ultra-high-strength steel (UHSS), and reveals detailed test results and best-practice recommendations for both coated and uncoated AHSS and UHSS steels.

Steel Handbooks - SSAB

Laser spot welding is a typical application of this type of weld. Most importantly, and similar to lap welds, the interface of the parts to be joined must be free from oxide and surface layers. The fit-up requirements are secondary. The beam must be powerful enough to penetrate a thickness equal to almost the total of the material thickness.
