Read Online Optimization Of Industrial Unit

attempting to optimize a process, industrial or not, you must understand it. All industrial processes involve individual operations that can be optimized by maximizing their efficiency and reducing their cost. By integrating all of them under these parameters and keeping a tight control over the measurement of each major factor

Abstract: This paper provides a method for automatically selecting optimal operational indices for unit processes in an industrial plant using measured data and without knowing dynamical models of the unit process. A dynamic multiobjective optimization problem is defined to find operational indices that lead to plant-wide
