Remove Starter Motor 2006 Harley

For the 2006 model year, Harley Davidson introduced a one-piece starter to the Touring line. Prior years had a separate jackshaft between the starter and ring gear. Those models require removal of the outer primary cover to remove the bolt that attaches the jackshaft to the starter. Those bikes are beyond the scope of this article.

Harley Davidson Touring: How to Replace the Starter | Hdforums

Although it is likely this video would still be of much assistance to older model Harley's. Prior to 2006 and the six speed transmissions, you had to remove the inner primary for starter removal and replacement. 2006 & above Harley models with six speed transmissions do not require you to remove the outer or

Harley Davidson Starter Replacement/Install & Starter ...

Use a 12mm wrench to remove the positive cable from the top of the Harley starter and use a 1/4" ball allen with an extension to remove the starter mounting hardware. If there are any obstructions, like the neutral switch wires, O2 sensor wires, or transmission vent hose, simply disconnect and move them aside temporarily.

Removing Harley Starter and Speed Sensor Location | Fix My Hog

Remove Cables from the Starter. On top of the Harley starter, there should be a rubber boot. Lift off the rubber boot. This exposes the positive battery cable and the nut. First, remove the nut with the 12mm wrench. Lift off the positive cable from the stud. Push the tab on the connector. Remove the start wire from the start solenoid. Remove the Bolts

An Easy Guide To Replacing A Harley Starter

Much like a car, the starter motor on various Harley Davidson models cranks the engine over via a geared shaft that engages the teeth on the clutch sprocket. When battery voltage is supplied to the starter solenoid, the starter interlocks with the clutch sprocket and uses the primary drive setup to spin the engine over.

Harley Davidson Dyna Glide: How to Replace Starter | Hdforums

Using a wrench, remove the positive cable nut and then lift the ring terminal off the starter terminal stud. Unplug the solenoid electrical connector from the solenoid. 11. Remove the two starter retaining bolts from the starter using a ratchet and Allen

driver. Pull the starter off the bike. Remove and discard the starter housing O-ring. Installation. 12.

Harley Davidson: Remove A Starter From A Harleydavidson ...

If you hear a "zing-zing" type of sound at start up, you have a bad starter clutch. Again, this condition makes for a poor engagement with the starter ring gear. If you hear a grinding sound when trying to start your Harley, you will need to remove your outer primary cover and inspect your starter ring gear.

In The Shop: Starter Ring Gear Replacement | Fix My Hog

To remove the starter, first disconnect the battery. Then remove everything from the right side of the bike so that you can gain access to the starter. Go to the left side of the bike and drain the primary and remove the cover. Remove the small bolt that holds the "starter jackshaft" on and remove the jackshaft.
