For centuries, sailors observed corona discharges at the tips of ship masts during storms at sea. They coined the phenomenon St. Elmo's fire, after the patron saint of sailors. Scientists have found that a corona discharge can strengthen in windy conditions, glowing more brightly as the wind further electrifies the air.

How airplanes counteract St. Elmo's fire during ...

Whatever the cause of Harvey's strength, I think serious provisions need to be made for ensuring that the city doesn't shut down in this type of storm again. But that serious commitment is going to have to go up against a lot of anti-government ideology, and a lot of skepticism about regional planning and regional governance.
