A modern super bike engine such as the Suzuki Hayabusa has a higher specific output, as does the Honda F20C. Where the G13B excels is in its absolute weight and simplicity. It will never beat a bike engine for naturally aspirated power, for reasons listed below, but due to the ability to bolt it to a car gearbox it can make a more reliable package.

My baleno (esteem) (esteem) has the G13BB just wondering if the GTi head would be able to fit back on that block. I did alot of research and realise most guys went for the G16B & GTi head because bpth engines basically have the same parts from block to the head (but the GTi is DOHC while the G13BB & G16B are SOHC).
